Based in Winter Garden, FL (Orange County, Orlando metro)

CORE COMPETENCIES

Cloud platform engineering

Azure, AWS and Kubernetes landing zones; Terraform and policy-as-code; GitOps and progressive delivery; cost governance.

Compliance engineering

HIPAA, SOC 2 and NIST SP 800-171-aligned control architecture with continuous evidence pipelines, audit-ready artifacts and security-questionnaire programs.

Cybersecurity architecture

Zero-trust identity and workload patterns; secrets and credential lifecycle; detection engineering; supply-chain and SBOM controls.

AI-enabled operations

Runbook synthesis, evidence collation, incident triage and change-risk analysis, shipped as auditable software.

Change management as code

CAB workflows, standard-change catalogs, and change traceability enforced on every commit and deployment.

Fractional CTO / platform leadership

Architecture direction, operating models, hands-on delivery, and training for client engineering teams.

DIFFERENTIATORS

Founder-led, principal-level authorship

Architecture, code and operating model are written by senior leadership on every engagement, not subcontracted.

Regulated-environment experience

The founder has built enterprise cloud platforms inside a major health system, with PHI on Azure and Kubernetes, and brings Deloitte delivery discipline. Key-personnel experience, not company past performance.

Evidence, not narrative

Controls generate their own audit artifacts from the running system, so assurance does not depend on a slide deck.

Operating Library, published

Single-page guides on running regulated cloud infrastructure, each with a free template and no email gate. The same practices run Atlas, our in-house AI-operations platform.

A public trust page; BAAs and NDAs signed

Operating posture, data handling and sub-processors sit on one page for procurement reviewers. We execute a BAA before any PHI-adjacent access and mutual NDAs before sensitive material moves.

Fixed-scope, stated-price engagements

Every commercial tier publishes its price, scope and exclusions. We keep a small concurrent caseload and deliver remotely nationwide, so a prime can see how we scope work before teaming.

PAST PERFORMANCE AND TEAMING

Commercial; references on request. No federal prime or subcontract awards to date.

Teaming: Prime contractor or small-business subcontractor; terms set per opportunity.

COMPANY DATA

LEGAL NAME

Kaan Systems LLC (Florida LLC)

UEI

D74VLMN2YCQ8

CAGE CODE

23P69

SAM.GOV

Registered, active; record visible to signed-in SAM.gov users

NAICS (2022)

541512 Computer Systems Design Services (primary)

SIZE

Small business, self-represented in SAM.gov

DELIVERY

Remote, nationwide; on-site in Central Florida

PAYMENT

Government purchase card (GPC) and ACH accepted

INSURANCE

Errors & omissions (E&O)

CLEARANCES

None (unclassified work)

SBA CERTIFICATIONS

None

CONTRACT VEHICLES

None

STATE AND LOCAL

MyFloridaMarketPlace (State of Florida): registered vendor since September 2026
